Serang, Banten

Computer Science student and freelance software engineer with experience developing web and mobile applications using React, Next.js, React Native, Expo, and Firebase. Skilled in building responsive interfaces, dashboard systems, automation tools, and scalable application features. Experienced in debugging, problem-solving, API integration, and adapting to technical environments with strong self-learning ability and project-based development experience.

Experiences

Self-Employed - Serang, Indonesia <i>Software Engineer</i> Freelance software engineer specializing in modern web and mobile application development. - Developed cross-platform mobile applications using React Native and Expo. - Built responsive web applications using React.js and Next.js. - Integrated Firebase authentication, real-time database, and cloud storage services. - Collaborated with clients to implement application features based on requirements.	Feb 2024 - Present
Bisha Audio - Serang, Indonesia <i>Audio Engineer (Part-Time)</i> Audio equipment and live sound services for events and performances. Managed live audio mixing and sound system setup for events.	Apr 2026 - Present
Self-Employed - Serang, Indonesia <i>Small Business Owner</i> Retail business specializing in household products and daily consumer goods. - Oversaw procurement, sales, inventory, and customer service operations. - Maintained supplier relationships and product availability.	Dec 2013 - Jan 2024
Sinar Harapan Workshop - Serang, Indonesia <i>Purchasing Assistant</i> - Managed procurement of technical materials and workshop equipment. - Monitored inventory levels and raw material availability for production operations.	Dec 2016 - Nov 2018
PT. Indonesia Nippon Seiki - Serang, Indonesia <i>QC Inspector</i> - Inspected automotive components to ensure compliance with quality standards. - Maintained quality documentation and inspection records. - Collaborated with the production team to identify and resolve quality issues.	Apr 2012 - Nov 2013
PT. Indonesia Nippon Seiki - Serang, Indonesia <i>Kaizen Intern</i> - Assisted continuous improvement activities in manufacturing operations. - Learned lean manufacturing and workplace safety procedures.	Nov 2009 - Jan 2010

Education

SMK Negeri 2 Kota Serang  - Serang, Indonesia <i>Senior High School, Mechanical Engineering</i> Completed industrial internship in Kaizen and manufacturing operations.	Jul 2008 - May 2011
Bina Bangsa University - Serang, Indonesia <i>Bachelor of Computer Science</i> Focused on software development, web technologies, and database systems.	Sep 2020

Projects

Personal Portfolio Website - Remote <i>Frontend Developer</i>	Sep 2025 - Present
---	--------------------

Personal portfolio website showcasing software development projects, technical skills, and professional experience.

Portfolio: [yanas-dev.vercel.app](#)

- Developed a responsive personal portfolio website using Next.js and modern web technologies.
- Showcased software development projects and technical skills.

Sentiment Analysis Project

Dec 2025 - Present

Python Developer / Data Analyst

Built a real-time sentiment analysis dashboard using Python and Streamlit to analyze user reviews from Google Play Store and YouTube.

- Collected and processed user comments from multiple platforms.
- Implemented sentiment classification (positive, neutral, negative) using Python-based NLP techniques.
- Built interactive data visualization dashboard using Streamlit.
- Enabled data export functionality for analysis results.

Clickerpy - Remote

Jan 2025 - Present

Python Developer

A lightweight Python-based desktop automation tool designed to perform automated mouse clicking with customizable settings.

- Developed a desktop automation tool using Python for simulating mouse clicking tasks.
- Implemented customizable click intervals, click modes, and automation control features.
- Built a user-friendly GUI using Tkinter for easy configuration and interaction.
- Integrated PyAutoGUI for system-level automation.

Skills, Achievements & Other Experience

- **RevoU Coding Camp** (2025): A 1-week Intro to Software Engineering certified online course offered by RevoU
- **Literasi Cyber Security** (2025): Organized by the Government of Banten Province and Kementerian Komunikasi dan Digital Republik Indonesia (KOMDIGI) Participated in a cybersecurity literacy program focused on cyber awareness, digital security practices, and challenges in the digital transformation era.
- **Belajar Dasar Manajemen Proyek** (2025): Dicoding Indonesia Learned fundamental project management concepts including project lifecycle, Agile and Waterfall methodologies, organizational structures, and cross-functional collaboration.
- **Belajar Back-End Pemula dengan JavaScript** (2025): Dicoding Indonesia Learned to build and deploy RESTful APIs using Node.js, Hapi, and Amazon EC2 following AWS competency standards. Applied API testing with Postman and implemented CRUD operations for back-end web services.
- **Belajar Dasar Pemrograman JavaScript** (2025): Dicoding Indonesia Learned core JavaScript fundamentals for Node.js development based on AWS-validated industry standards. Applied Object-Oriented Programming (OOP), Functional Programming, asynchronous programming (Promises & Async/Await), and modular JavaScript concepts to build maintainable applications.
- **The Basics of Google Cloud Compute** (2025): A skill badge by completing the The Basics of Google Cloud Compute skill badge course, where you learn how to work with virtual machines (VMs), persistent disks, and web servers using Compute Engine
- **AI Praktis untuk Produktivitas** (2025): Dicoding Indonesia Basic Level Training Program - This Program is part of the AI Opportunity Fund: Asia Pacific in collaboration with AVPN , supported by Google.org and Asian Development Bank .
- **Belajar Dasar Cloud dan Gen AI di AWS** (2025): Dicoding Indonesia Learned cloud computing fundamentals based on AWS standards, including EC2, S3, VPC networking, cloud security, monitoring, and pricing models. Explored AWS global infrastructure, Shared Responsibility Model, and the basics of Generative AI and Machine Learning.
- **AI Praktis untuk Produktivitas** (2025): Dicoding Indonesia Basic Level Training Program Part of the AI Opportunity Fund: Asia Pacific in collaboration with AVPN , supported by Google.org and Asian Development Bank . Learned AI productivity tools, prompt engineering, ethical AI usage, and AI-assisted workflow optimization.
- **Personal Portofolio Website** (2025): Front-End Project Web Development using Next.js
- **Sentiment Analysis Project** (2025): Built a sentiment analysis dashboard using Python and Streamlit to analyze and visualize text data.
- **Clickerpy** (2025): Created a cross-platform clicker automation tool using Python to simulate mouse clicking actions.
